

## HOW TO FIT YOUR BLANKET

The fit of your blanket is extremely important for the comfort of your horse. A properly fit blanket prevents rubbing and slippage. Often horses of the same height come in a variety of shapes and sizes. For this reason, it is useful to take certain measurements of your horses. Measure the distance from the centre of the chest across the point of shoulder to the centre of the tail (figure X). Horseware blankets (Rambo®, Rhino® and Amigo®) are sized in three inch increments. Rambo® Quarter Horse is sized in two inch increments. If you measure between sizes, round down for Rambo blankets and measure up for Rhino®, Amigo® and Rambo® Quarter Horse blankets.
